

UNITED STATES DISTRICT COURT
DISTRICT OF MASSACHUSETTS
EASTERN DIVISION

JOHN J. VAUGHN,
GERALD A. KALBFLEISCH, and
MICHAEL and MYRTLE HATHAWAY,

Plaintiffs,

v.

PUTNAM INVESTMENT
MANAGEMENT, LLC and

PUTNAM RETAIL
MANAGEMENT LIMITED PARTNERSHIP

Defendants.

Civil Action No: _____

COMPLAINT

Plaintiffs, John J. Vaughn, Gerald A. Kalbfleisch, Michael Hathaway and Myrtle Hathaway file this Complaint against Putnam Investment Management, LLC and Putnam Retail Management Limited Partnership (collectively “Putnam” or the “Defendants”) and allege as follows:

I. INTRODUCTION

1. Section 36(b) of the Investment Company Act of 1940 (the “ICA”) imposes a fiduciary duty on mutual fund investment managers (and their affiliates) with respect to their receipt of compensation. Defendants provide investment management and other services to the Putnam family of mutual funds for compensation and have breached their fiduciary (and other) duties to those funds by receiving excessive fees.

2. The Plaintiffs are shareholders in several mutual funds (technically known as open-end registered investment companies) as identified on Exhibit 1 (the “Funds”). The Funds

were formed, and are distributed, advised and managed, by the Defendants. Plaintiffs seek to recover all damages available pursuant to Section 36(b) of the ICA, including all compensation received by the Defendants, directly or indirectly, from the Funds for the period beginning one year prior to the filing of this Complaint through the date of trial.

3. The present case does not seek class action status and is not subject to transfer to any multidistrict litigation proceedings currently pending, including those in the District of Maryland captioned *In Re Mutual Funds Investment Litigation*, MDL-1586. The Judicial Panel's basis for coordinating and consolidating the various individual actions that comprise MDL-1586 is that they "involve common questions of fact concerning allegations of market timing and/or late trading in the mutual fund industry." By contrast, this action does not involve allegations that Defendants or their affiliates have engaged in unlawful market timing, late trading, manipulation of closing net asset values, or similar conduct. This matter is brought solely under Section 36(b) of the ICA, and addresses Defendants' breach of their fiduciary duties imposed by that Section through their receipt of excessive fees.

4. Defendant Putnam Investment Management, LLC ("PIM") manages the Funds pursuant to a management agreement and receives substantial fees. Both in dollar terms and in comparison to fees received by Putnam for managing other virtually identical institutional portfolios, the fees received from the Funds are staggering and excessive.

5. PIM's management activities include selecting securities for the Funds to buy, sell or hold (the "Portfolio Selection Services") and providing administrative services. It receives a management fee from the Funds for these activities that is calculated as a percentage of total

assets under management. That portion of the management fee attributable solely to Portfolio Selection Services is referred to herein as the “Portfolio Selection Fee.”

6. All mutual funds, including the Funds, create economies of scale as assets under management increase. All of the Funds are large. The smallest approaches \$600 million in assets under management (see Exhibit 1). The Putnam Voyager Fund has almost \$7 billion in assets and the Fund for Growth and Income has almost \$15 billion in assets. The larger a portfolio, the greater the cost savings and benefits from economies of scale. It costs less to provide investment advisory services for each additional dollar of assets under management. Eventually, when portfolios become as large as the Funds, the cost of providing Portfolio Selection Services for each additional dollar of assets under management approaches zero.

7. Defendants (directly or through their affiliates) also provide Portfolio Selection Services to other institutional portfolios. The contracts for those services confirm the excessive nature of the fees received by PIM from the Funds. The Portfolio Selection Services that PIM provides to the Funds are nearly identical to the portfolio selection services provided to other institutional clients by the Defendants, including through their affiliate “Putnam Advisory Company” or “PAC”. However, unlike the advisory contracts between PIM and the Funds, the contracts that PAC negotiates with other institutional clients are the product of arms’ length negotiations.

8. The fees received from the Funds by Defendants for Portfolio Selection Services are several times larger on a percentage basis and up to hundreds of times larger in total dollars than the fees received from the other institutional clients for the same services, even though the portfolios of other institutional clients are much smaller and do not offer the same economies of

scale as the Funds. The much higher Portfolio Selection Fees that PIM receives from the Funds have not, and could not have, resulted from arms' length negotiations.

9. In addition to the management fees received by PIM, the Defendants also receive fees ("Distribution Fees") pursuant to share distribution plans adopted under Rule 12b-1, 17 C.F.R. § 270.12b-1 ("Distribution Plans"). Like the Portfolio Selection Fees, the 12b-1 Distribution Fees are based on a percentage of the net assets of the funds in the Putnam Fund Complex, including the Funds.

10. A large portion of 12b-1 Distribution Fees received by Defendants are properly payable only if the Funds' boards of directors find that there is a reasonable likelihood that the Plaintiffs and other holders of Fund shares would benefit from economies of scale through reduced advisory fees. These fees (the challenged portion of total Distribution Fees) shall be referred to as "Promotional Distribution Fees" (some portion of 12b-1 Distribution Fees are used for other purposes, such as paying contingent deferred sales commissions to broker-dealers who sell Putnam funds).

11. Although assets held by the Funds have indeed increased significantly over time, Defendants have failed to share the resulting economies of scale with Plaintiffs or other shareholders of the Funds. Instead, as assets increased, Defendants simply continued to receive from the Funds ever greater fees.

12. The receipt by Defendants of the Portfolio Selection Fees from the Funds constitutes a breach of their fiduciary and other duties to the Funds. The receipt by Defendants of the Promotional Distribution Fees also constitutes a breach of their fiduciary and other duties to the Funds.

13. Plaintiffs seek to (a) recover all fees and compensation received by the Defendants and their affiliates from the Funds in violation of Section 36(b) of the Investment Company Act of 1940, 15 U.S.C. § 80a-35(b), including all Portfolio Selection Fees and all Promotional Distribution Fees, (b) recover all other or further benefits resulting from the economies of scale created by the Funds but wrongfully retained by the Defendants, (c) rescind the management agreements between Defendants and the Funds and, finally, (d) rescind the Distribution Plan because it was not approved as required by the ICA and receipt by Defendants of payments pursuant to that plan also breaches Section 36(b).

II. PARTIES

14. Plaintiff Gerald A. Kalbfleisch (“Kalbfleisch”) is a resident of Belleville, St. Clair County, Illinois and is a shareholder in the Putnam Classic Equity Fund. Kalbfleisch continuously owned shares in this fund from at least January 1, 2007 through the present date.

15. Plaintiffs Michael and Myrtle Hathaway are residents of Ellis Grove, Randolph County, Illinois and are joint shareholders in the Putnam Fund for Growth and Income and the Putnam Investors Fund. The Hathaways continuously owned shares in these funds from at least January 1, 2007 through the present date.

16. Plaintiff John J. Vaughn is a resident of Granite City, Madison County, Illinois and is a shareholder in the Putnam Voyager Fund and the Putnam Growth Opportunities Fund. Plaintiff Vaughn continuously owned shares in this fund from at least January 1, 2007 through the present date.

17. Defendant PIM is a Delaware limited liability company with its principal place of business in Boston, Massachusetts. PIM is registered as an investment adviser in Massachusetts and under the Investment Advisers Act of 1940 and is the investment adviser to the Funds.

18. Defendant Putnam Retail Management Limited Partnership (“PRM”) is a Massachusetts limited partnership with its principal place of business in Boston, Massachusetts. Putnam Retail Management Limited Partnership is registered in Massachusetts as a broker/dealer and is affiliated with PIM (both are commonly owned by Putnam, LLC). PRM serves as the principal underwriter for the Funds.

III. JURISDICTION AND VENUE

19. This action is brought pursuant to § 36(b) of the Investment Company Act of 1940 (“ICA”), as amended, 15 U.S.C. § 80a-35(b) and § 80a-12(b).

20. This Court has subject matter jurisdiction pursuant to 15 U.S.C. § 80a-43, 15 U.S.C. § 80a-35(b)(5), and 28 U.S.C. § 1331.

21. Venue is proper in this judicial district pursuant to 15 U.S.C. § 80a-43 and 28 U.S.C. § 1391(b)(1) and (2). Defendants reside in this district and routinely transact business in this district. PIM is registered as an investment adviser in Massachusetts and Putnam Retail Management Limited Partnership is registered in Massachusetts as a broker/dealer. Defendants advertise and market Fund shares in Massachusetts. Several of the Funds’ trustees/directors live and work in Massachusetts.

IV. GENERAL ALLEGATIONS

The Investment Company Act of 1940

22. In 1940, Congress enacted the Investment Company Act of 1940, 15 U.S.C. § 80a-1 et seq. (the “ICA”). The ICA was designed to regulate and curb abuses in the mutual fund industry and to create standards of care applicable to investment advisers such as Defendants. In the 1960s, it became clear to Congress that investment advisers to equity mutual funds were gouging those funds with excessive fees. As a result, § 36(b) was added to the ICA in 1970 (primarily to remedy excessive fees charged by mutual funds such as those owned by Plaintiffs) and created a federal cause of action for breach of fiduciary duty by investment advisers and their affiliates such as Defendants.

23. Section 36(b) provides in pertinent part:

[T]he investment adviser of a registered investment company shall be deemed to have a fiduciary duty with respect to the receipt of compensation for services, or of payments of a material nature, paid by such registered investment company, or by the security holders thereof, to such investment adviser or any affiliated person of such investment adviser. An action may be brought under this subsection by the Commission, or by a security holder of such registered investment company on behalf of such company, against such investment advisers, or an affiliated person of such investment adviser, or any other person enumerated in subsection (a) of this section who has a fiduciary duty concerning such compensation or payments, for breach of fiduciary duty in respect to such compensation or payments paid by such registered investment company or by the security holders thereof to such investment adviser or person

The Portfolio Selection Fees

24. PIM receives a “management” fee from each of the Funds. The management fee compensates PIM for Portfolio Selection Services and certain limited “administrative” expenses (the bulk of administrative costs are received outside of and separately from the management fee).

25. Although the Portfolio Selection Fees challenged may appear to be very small on a shareholder-by-shareholder basis, they are huge in absolute terms and, even on a shareholder-by-shareholder basis, cause a dramatic decrease in shareholders' investment returns over time. Arthur Levitt, past Chairman of the SEC, has observed this and is critical of what he calls the "tyranny of compounding high costs":

Instinct tells me that many investors would be shocked to know how seemingly small fees can, over time, create such drastic erosion in returns. . . . In the years ahead, what will mutual fund investors say if they realize too late their returns have fallen hard under the weight of compounding fees?

Arthur Levitt, Jr., Inaugural address: Costs Paid with Other People's Money, Address at Fordham University School of Law (Nov. 3, 2000), in 6 Fordham J. Corp. & Fin. L. 261, 267 (2001) [Exhibit 2].

26. The management fees received by PIM are paid as a varying percentage of assets under management. The fees vary based on the amount of assets under management, and are reduced as the total amount of assets under management increase. Known as "breakpoints," this fee structure implicitly recognizes the existence of economies of scale and gives the appearance that the Funds share in those benefits. However, the initial management fee is too high, breakpoints are spaced too far apart, and the reductions made at breakpoints are far too small, thereby depriving the Plaintiffs and the Funds of the benefits of the economies of scale created by the contribution of their capital to the Funds.

27. As Fund portfolios grow, they quickly create economies of scale and eventually the cost of servicing additional assets approaches zero. Breakpoints recognize these economies

(the current breakpoints for each Fund are shown on Exhibit 3) but, as stated, are designed by Defendants to benefit themselves rather than the Funds.

28. For example, the first breakpoint for the Funds occurs at \$500 million. Significant economies of scale are created by the Plaintiffs' and other shareholders' investments in the Funds long before this initial breakpoint, but they are not shared with the Funds. By the time assets under management reach \$1 billion, these economies of scale are tremendous yet Defendants do not allow another breakpoint until that level and retain for themselves the benefits created by economies of scale between breakpoints.

29. A flat Portfolio Selection Fee (in dollars, not percentages) or a breakpoint approaching zero for very large portfolios such as those of the Funds would allow the Funds to capture economies of scale that belong to them under Section 36(b), while also allowing Defendants to earn a fair and competitive profit for their services.

30. The total management fee received by Defendants from each Fund consists of a pure Portfolio Selection Fee component and a much smaller administrative services component. Subtracting the administrative services component from the total management fee for each Fund leaves the Portfolio Selection Fee for each Fund.

31. The portion of the management fee paid by the Funds to PIM that is attributable to administrative costs is no more than 0.1% (10 basis points) of total Fund assets. Mutual funds from fund complexes other than Putnam, of comparable size and investment objectives, incur administrative costs of less than 0.1% (10 basis points). For example, the American Funds' Washington Mutual Investors Fund reports separately (unlike the Funds) the total fees attributable to administrative costs. Those costs are 0.069% (6.9 basis points) of total net assets.

Indeed, Washington Management Corporation, the entity that provides the administrative services to the Washington Mutual Investors Fund, is currently waiving 10% of the fees attributable to these administrative costs, resulting in administrative charges to the fund of .062% of net assets (6.2 basis points) for the fiscal year ending April 30, 2007.

32. Furthermore, economies of scale also exist with respect to the administrative costs component of the management fee. For example, at the final breakpoint, the American Funds' Washington Mutual Investors Fund pays an administrative cost fee as low as 0.03% (3 basis points) of net assets under management. Thus, the administrative costs component of a mutual funds' management fee declines as assets increase, thereby establishing by comparison that the administrative costs portion of the management fee charged by Defendants to the Funds is less than 0.1% (10 basis points) of total net assets.

33. The chart at Exhibit 4 sets forth the Portfolio Selection Fee received by Defendants during recent reported periods allowing a (generous) 0.1% of total net assets as the administrative cost portion of the management fee.

34. The Portfolio Selection Fees received by Defendants from the Funds are excessive.

35. Defendants' receipt and acceptance of the Portfolio Selection Fees for pure Portfolio Selection Services was (and continues to be) in breach of its fiduciary and other duties.

The Funds' Rule 12b-1 Distribution Plans and Fees

36. "12b-1" Distribution Fees are named for the SEC rule that allows and regulates their payment, 17 C.F.R. § 270.12b-1. Rule 12b-1 permits a fund to market and sell its shares

with shareholder funds (Distribution Fees) out of fund assets only in strict compliance with the rule.

37. Prior to 1980, the use of shareholder funds to market and sell fund shares was prohibited. The SEC was historically reluctant to allow fund advisers to charge their shareholders for selling shares to others:

[T]he cost of selling and purchasing mutual fund shares should be borne by the investors who purchase them and thus presumably receive the benefits of the investment, and not, even in part, by the existing shareholders of the fund who often derive little or no benefit from the sale of new shares.

Statement on the Future Structure of the Securities Markets, [Feb. 1972] Sec. Reg. & L. Rep. (BNA) No. 137 pt. II, at 7.

38. After intense lobbying by the mutual fund industry, the SEC agreed to consider tempering its objections to allow current fund shareholders to pay distribution expenses. In early comment letters and in proxy statements proposing adoption of plans of distribution, the mutual fund industry argued (correctly) that adding assets in an existing mutual fund would create economies of scale that would allow the advisers to provide the same quality and nature of services to mutual fund shareholders at dramatically lower costs.

39. Accepting the mutual fund industry's argument that a growth in assets would lead to a quid pro quo reduction in advisory fees and other expenses, the SEC tentatively approved Rule 12b-1, 17 C.F.R. § 270.12b-1. However, numerous conditions were attached to the use of shareholder funds to pay distribution expenses. For example, the SEC wanted to be certain that investment advisers would not "extract additional compensation for advisory services by

excessive distributions under a 12b-1 plan.” *Meyer v. Oppenheimer Management Corporation*, 895 F.2d 861, 866 (2d Cir. 1990).

40. Defendants have done just what the SEC feared: extracted additional compensation for their retail advisory services by causing Plaintiffs and other shareholders to pay Defendants’ marketing expenses to retain and acquire new shareholders so that these shareholders will pay additional advisory fees that benefit them rather than the Plaintiffs and the Funds.

41. 12b-1 Distribution Plans must be reviewed annually by the Funds’ board of trustees. In particular, the board must “request and evaluate . . . such information as may reasonably be necessary to an informed decision of whether such plan should be implemented or continued.” 17 C.F.R. § 270.12b-1(d). Defendants are required to furnish this information. 17 C.F.R. § 270-12b-1(d). In addition, minutes must be maintained to record all aspects of the boards’ deliberation. On an annual basis, the board must conclude “in light of their fiduciary duties under state law and under Sections 36(a) and (b) of the ICA, that there is a reasonable likelihood that the Distribution Plans will benefit the company and its shareholders.” 17 C.F.R. § 270.12b-1(e).

42. The Funds’ Distribution Plans have not been adopted in accordance with these rules. The board could not legitimately find that the Distribution Plans in general or the Promotional Distribution Fees in particular benefit the Funds or its shareholders by generating savings from economies of scale in excess of the cost of the plan. In fact, despite the dramatic growth in total assets held by the Funds, both the management fee (including the Portfolio Selection Fee) and total 12b-1 Distribution Fees (including Promotional Distribution Fees)

received by Defendants have grown over time, thus depriving the Funds of the benefit of these economies of scale in breach of Defendants' fiduciary and other duties.

43. For example, for the first full fiscal year the Putnam Voyager's 12b-1 plan was in effect (ending July 31, 1991), its shareholders paid less than \$2 million in 12b-1 Distribution Fees. 12b-1 Distribution Fees grew to more than \$24 million as of Voyager's last reported fiscal year, and remain at similar excessive levels to the present date.

44. Over that same time, total management fees for the Putnam Voyager Fund soared from \$4.6 million (or approximately \$0.04 per share) to \$36 million (or \$0.095 per share) as of the fiscal year ending July 31, 2007, of which \$29.1 million is for pure Portfolio Selection Services. Total management fees, and the Portfolio Selection Fees, remain at similar excessive levels to the present date.

45. Similarly, for the first full fiscal year the Putnam Fund for Growth and Income's 12b-1 Distribution Plan was in effect (ending July 31, 1991), its shareholders paid \$4.5 million in 12b-1 Distribution Fees. In fiscal year 2006 (ending on October 31), those fees had grown to approximately \$51 million and remain at similar excessive levels to the present date.

46. Over that same time, total management fees for the Fund for Growth and Income soared from just over \$11 million (or approximately \$0.054 per share) to \$66 million (or \$0.095 per share), of which approximately \$50.8 million was for pure Portfolio Selection Services. Total management fees, and the Portfolio Selection Fees, remain at similar excessive levels to the present date.

47. The Promotional Distribution Fee portion of these fees increased along with total 12b-1 Distribution Fees. These fees have produced no benefits to Fund shareholders; rather, they have served only Defendants, just as the SEC feared when it found that:

the use of mutual fund assets to finance distribution activities would benefit mainly the management of a mutual fund rather than its shareholders, and therefore that such use of fund assets should not be permitted.

Bearing of Distribution Expenses by Mutual Funds, Investment Company Act Release No. 9915, 1977 SEC LEXIS 943 (Aug. 31, 1977). As such, the Funds' Distribution Plans violate the intent and purpose of Rule 12b-1, the Distribution Fees are entirely a waste of fund assets and their receipt by Defendants violates Section 36(b).

48. The Distribution Plan itself underscores the absence of any benefit to the Plaintiffs or holders of shares in the Funds other than Y Class shareholders. The Funds issue a class of institutional shares (called "Y Shares") the holders of which pay no 12b-1 Distribution Fees (including Promotional Distribution Fees). This class of shares was created to meet the demands of institutional investors who refuse to pay 12b-1 Distribution Fees because they clearly understand that the payment of such fees benefits only Defendants. This includes, for example, qualified retirement plans that are clients of third party administrators that have entered into agreements with Putnam and offer institutional share class pricing.

49. The existence of this "12b-1 fee free" class of shares demonstrates that the Funds' Distribution Plans should never have been adopted or continued year after year. If the economies of scale created by additional assets (including those prompted by the Promotional Distribution Fees) were shared with the Funds (as required by the enabling rule), then the purchasers of the "12b-1 free" Y Shares would be eager to pay them and obtain their benefit. The benefits created by economies of scale were not shared with the Plaintiffs or the Funds, the

adoption and continuation of the Promotional Distribution Fees is contrary to Rule 12b-1 and their receipt by Defendants violates Section 36(b).

50. Furthermore, as the purpose of Promotional Distribution Fees is to increase the assets held by the Funds, as assets have increased, the Promotional Distribution Fees should decline as assets increase, especially when caused by a generally rising market. This has not happened. In fact, much of the increase in Promotional Distribution Fees is due to a rising equity market, and not due to any promotional activities of Defendants. The Dow Jones Industrial Average (the “Dow”) rose from 2753 in 1990 to over 13,000 today. This market expansion alone greatly increased 12b-1 Promotional Distribution Fees with no additional work or effort on behalf of Defendants.

51. Despite the fact that Plaintiffs and the other Fund shareholders have enjoyed no benefits from the Promotional Distribution Fees, and despite the fact that the Funds’ Distribution Plan allowed Defendants to extract additional and excessive compensation from the Funds, the directors of the Funds approved, year after year, continuation of the Plan in violation of both Rule 12b-1 and § 36(b).

52. Plaintiffs, on behalf of the Funds, are entitled to recover the Promotional Distribution Fees received (and continuing to be received) by Defendants.

The Gartenberg Test

53. As set forth in *Gartenberg v. Merrill Lynch Asset Management, Inc.*, 694 F.2d 923 (2d Cir. 1982) (decided long before today’s computer and internet capabilities existed and before the in-depth studies by the GAO and SEC), the test for determining whether compensation paid to Defendants violates § 36(b) is “essentially whether the fee schedule

represents a charge within the range of what would have been negotiated at arm's-length in the light of all of the surrounding circumstances.” *Id.* at 928. Stated differently, “the adviser-manager must charge a fee that is so disproportionately large that it bears no reasonable relationship to the services rendered and could not have been the product of arm's length bargaining.” *Id.*

54. The Defendants’ receipt of fees from the Funds for Portfolio Selection Services breaches their fiduciary duties under § 36(b) because they are excessive. The Portfolio Selection Fees negotiated with other institutional clients (*i.e.*, clients other than the Funds or other Putnam funds) for managing smaller portfolios are substantially less than the Portfolio Selection Fees received from the Funds. That is because the Funds’ fee schedule does not “represent[] a charge within the range of what would have been negotiated at arms-length.” In fact, the fees charged to the Funds have never been within or near such a range. Moreover, this information has been partially withheld by Defendants from the Funds’ board of trustees (and also from the shareholders), and the board has failed to properly consider the information.

55. Similarly, the Promotional Distribution Fees do not “represent[] a charge within the range of what would have been negotiated at arm's-length.” Indeed, when an arms length negotiation takes place, the result is that no 12b-1 Distribution Fees are paid. When institutional investors wish to retain Defendants to manage their assets, they pay no Distribution Fees and have significantly lower Portfolio Selection Fees.

56. In applying the *Gartenberg* test, all pertinent facts must be weighed in determining whether a fund manager’s fee or other compensation violates § 36(b). The *Gartenberg* court specifically identified six factors (a portion of “all pertinent facts”) to be

considered in determining whether a fee is so disproportionately large that it bears no reasonable relationship to the services rendered and could not have been negotiated at arms' length. Here, each factor demonstrates that receipt of the Portfolio Selection and Promotional Distribution Fees by the Defendants violated (and continues to violate) § 36(b).

(1) Economies of Scale

57. Significant economies of scale exist in the investment advisory industry, especially in the area of providing investment advisory services (including Portfolio Selection Services) to clients such as the Funds. Indeed, Defendants admit in their public filings that economies of scale exist. Economies of scale are created when assets under management increase more quickly than the cost of advising and managing those assets. At some point (a point exceeded by the Funds), the additional cost to advise each additional dollar in the Funds (whether added by a rise in the value of the Funds' securities or additional contributions by current or new shareholders) approaches zero.

58. For example, the cost of providing Portfolio Selection Services to the Funds may be \$X for the first \$100 million of assets under management but the cost for providing those same services for the next \$100 million is a mere fraction of \$X. This is true in part because each Fund's portfolio investment objectives are set forth in their offering documents and additional dollars contributed by shareholders are simply invested in the same core portfolio of securities. In addition, when assets under management increase in value over time as markets rise or existing shareholders purchase additional shares (with no change in the composition of the Funds' portfolios or number of shareholders), there are no additional Portfolio Selection Service costs incurred by PIM.

59. The benefits created by these economies of scale belong to the Funds and the Plaintiffs, not the Defendants or their affiliates.

60. Technology has lowered the costs to Defendants of providing the Portfolio Selection Services. For example, it has become far easier and less expensive to obtain research about potential investments, and to communicate with the Funds and their shareholders, than regulators and courts in the early days of Section 36(b) could ever have imagined. Defendants benefit from the widespread use of computers with exponentially greater computing power today than those of 20 years ago, company and stock research is readily and instantly available on the Internet, and Defendants are able to transact business with current and potential shareholders on the Internet. All of this dramatically lowers Defendants' costs and should have resulted in significantly lower Portfolio Selection Fees over time. Instead, those fees (in both percentage and dollar terms) have not declined as they should have but increased because of Defendants' violation of their fiduciary duties.

61. These economies of scale exist at the individual fund level (including the Funds) and at the complex or family of funds level (meaning all funds advised by the Defendants considered together). They also exist on a more comprehensive basis, encompassing the Defendants' entire scope of operations, including administrative expenses and advisory services provided to other institutional clients.

62. Notable academic research confirms the long-standing existence of significant economies of scale in the mutual fund industry that are not passed on to shareholders. *See* John P. Freeman & Stewart L. Brown, *Mutual Fund Advisory Fees: The Cost of Conflicts of Interest*, 26 J. Corp. L. 610 (2001) (the "Freeman & Brown Study") [Exhibit 5].

63. Furthermore, both the Securities and Exchange Commission (the “SEC”) and the Government Accounting Office (the “GAO”) also confirmed, in June of 2000, that economies of scale exist in the provision of Portfolio Selection Services. *See* SEC Report at 30-31 [Exhibit 6]; Government Accounting Office, Report on Mutual Fund Fees to the Chairman, Subcommittee on Finance and Hazardous Materials; and the Ranking Member, Committee on Commerce, House of Representatives (June 2000) (“GAO Report”), at 9 [Exhibit 7].

64. Courts have also found that these economies of scale exist. *Migdal v. Rowe Price Fleming Int’l, Inc.*, 248 F.3d 321, 326-27 (4th Cir. 2001). Even the mutual fund industry’s lobbying arm, the Investment Company Institute (“ICI”), admits that mutual funds exhibit economies of scale. Thus, it cannot be disputed that extensive and significant economies of scale exist in the provision of investment advisory services, in particular Portfolio Selection Services, by advisers or affiliates such as Defendants to mutual funds such as the Funds.

65. One simple example of economies of scale is when total assets under management increase due purely to market forces. In that event, it is possible for the Defendants to service the additional assets at zero additional variable cost: there is no change in the securities held in the portfolios or the number of shareholders in the Funds.

66. The Defendants have benefited from economies of scale resulting from pure market appreciation. On January 1, 1990, the Dow Jones Industrial Average was at 2753. The Dow is presently above 13,000 (more than a four-fold increase). If a mutual fund merely held the stocks that comprise the Dow, and did nothing, the Portfolio Selection Fees and Promotional Distribution Fees would have nearly quadrupled absent meaningful breakpoints (an absence

suffered by the Funds) or unless the advisers dramatically reduced their fees (also not the case here).

67. Today, the Dow Jones Industrial Average is above 13,000, representing an almost four-fold increase from the levels of 1990. This growth has created enormous “free” economies of scale for the Funds, the benefits of which were wrongfully retained by the Defendants who incurred no additional costs in providing Portfolio Selection Services for the additional assets generated in the Funds by such market growth.

68. Another simple example of benefits arising through no effort on the part of the Defendants yet creating considerable economies of scale occurs when the Funds’ assets under management grow because of additional investments by current shareholders. Once again, no additional client relationship is established (or related costs incurred) and economies of scale are created by the shareholders of the Funds, the benefits of which must be shared with the Funds. Still, Defendants have failed to meaningfully reduce the Portfolio Selection Fees in either percentage or dollar terms.

69. These facts regarding economies produced by market appreciation are confirmed by the GAO and by the Freeman and Brown Study. See GAO Report at 9 (noting that growth from portfolio appreciation is unaccompanied by a growth in costs) [Exhibit 7]; Freeman & Brown Study. [Exhibit 5 at p. 619-21].

70. The assets in the Funds have grown dramatically over the past dozen years along with the growth generally in the stock market. For example, as of 1991, total assets in Voyager and Growth and Income amounted to \$3.7 billion. Total assets in those two Funds alone is now over approximately \$22 billion. Similar growth has occurred in the other Funds.

71. Defendants have benefited greatly from this growth in Fund assets as their receipt of fees exploded. For example:

- a. For the fiscal year ended July 31, 1991, the Putnam Voyager Fund had approximately \$1 billion in assets under management. PIM received approximately \$5 million in management fees and its affiliates received approximately \$2 million in total 12b-1 fees. For Voyager's 2007 fiscal year, fund assets soared to almost \$7 billion while management fees received by Defendants jumped to approximately \$41 million and 12b-1 Distribution Fees soared to over \$24 million.
- b. For the fiscal year ended October 31, 1991 the Putnam Fund for Growth and Income had approximately \$2.5 billion in assets under management. Defendants took in approximately \$11 million in management fees and \$4.5 million in total 12b-1 Distribution Fees. As of the fund's Semi-Annual Report dated April 30, 2007, the assets under management soared to almost \$15 billion, and in six months the shareholders had paid management fees to PIM over \$32 million and 12b-1 Distribution Fees to PRM over \$23 million.

72. The other Funds have produced similarly dramatic increases in fees received by Defendants, and for all Funds those dramatic increases continue as of the present date.

73. While the size of the Funds has grown dramatically, the nature and quality of the Portfolio Selection Services rendered by Defendants has not changed. Indeed, the number of securities held in each of the Funds' portfolios is not tied to the number of assets under management. For example, the Voyager Fund held 218 securities as of 1994 when there was

approximately \$4 billion in assets, and only 110 as of July 31, 2006 when there was more than \$8 billion in assets . The Fund for Growth and Income held 145 securities as of fiscal year 1998 when there was almost \$36 billion in assets, and 146 securities at the end of fiscal year 2006 when there was approximately \$15 billion under management . While the number of securities fluctuates over time, at best Portfolio Selection Services should show only minor changes in total cost, as the service has not changed significantly.

74. Despite this, the Portfolio Selection Fees and the Promotional Distribution Fees received by Defendants have grown dramatically, increasing in almost exact proportion with the increase in Fund assets, capturing the benefits from economies of scale and paying no heed to the actual cost of providing those services.

75. The retention by Defendants of the benefits resulting from economies of scale (benefits that are owned by, and should have been paid to, the Funds) resulted in Portfolio Selection Fees that were (and remain) (a) grossly disproportionate to the Portfolio Selection Services, (b) excessive, (c) could not have been the product of an arms' length bargain, and (d) violate § 36(b).

76. The retention by Defendants of the benefits resulting from economies of scale (benefits that are owned by, and should have been paid to, the Funds) also resulted in Promotional Distribution Fees that were (and remain) (a) grossly disproportionate to any actual or potential benefit they could have created, (b) excessive, (c) could not have been the product of an arms' length bargain, and (d) violate § 36(b).

77. Acceptance of the excessive Portfolio Selection Fees and the Promotional Distribution Fees by Defendants was (and remains) a breach of their fiduciary and other duties to the Funds.

(2) Comparative Fee Structures

78. A mutual fund is a single investment product for Defendants, as is any other institutional product. Accordingly, with respect to the Portfolio Selection Services and the Portfolio Selection Fees, a mutual fund is no different than any other institutional investor.

79. Other investors (including Y Share investors in the Funds and institutional investors) do not pay Promotional Distribution Fees. Instead, the cost of any distribution activities are paid by Defendants from the management fees received from those institutional investors. In contrast, the Defendants receive enormous Promotional Distribution Fees from the Funds. Therefore, the great discrepancy between the management fees that Defendants receive from other institutional investors as compared to those received from the Funds is actually understated because the management fees received from other institutional investors include all costs of marketing and distribution.

80. Defendants and their affiliates provide advisory services to other institutional clients for substantially lower fees. The fees received from other institutional clients are properly compared to those same fees received by Defendants from the Funds for Portfolio Selection Services. The Freeman & Brown Study explains:

Strong analogies . . . can be drawn between equity advisory services in the fund industry as compared to the pension field where prices are notably lower. [Exhibit 5 at 653].

* * *

[A] mutual fund, as an entity, actually is an institutional investor. When it comes to fee discrepancies, the difference between funds and other institutional investors does not turn on ‘institutional status,’ it turns on self-dealing and conflict of interest.” [Exhibit 5 at 629 n.93].

81. The Freeman and Brown study accurately explains the similarity between the provision of Portfolio Selection Services to a mutual fund, like the Funds, and other institutional investors with similar investment objectives.

82. Similarly, the respected mutual fund analyst firm Morningstar has concluded that there should be no difference between management fees charged to mutual funds (retail products) and other institutional clients:

Fees for a firm’s retail products should not be materially different from management fees for a firm’s institutional offerings. Though we appreciate the added costs of servicing small accounts, those expenses needn’t show up in the management fees.

Kunal Kapoor, *The Standards That We Expect Funds to Meet*, Morningstar, December 8, 2003.

83. Additional administrative costs incurred by PIM from servicing small retail mutual fund accounts are recovered through separate administrative fees in addition to the Portfolio Selection Fee. For example, in addition to the management fee, for fiscal 2006 the Funds paid separately for “investor servicing and custodian fees” (amounting to approximately \$30 million for the Voyager Fund and \$26 million for the Growth and Income Fund alone), compensation of trustees, other “administration” services and 12b-1 distribution fees, including Promotional Distribution Fees. Each of the Funds also pays millions in unspecified “other” expenses, a charge that for Voyager and Growth and Income alone amounted to approximately \$5.9 million in fiscal year 2006. Defendants continue to receive these additional, separate administrative fees at similar (excessive) levels to the present date. For example, Voyager Fund paid Defendants \$27 million during fiscal year 2007 in investor servicing and custodian fees.

84. Putnam Advisory Company, LLC (“PAC”) is an affiliate of Defendants that enters into management contracts with other institutional clients. The management fees received by PAC from institutional investors can be properly compared to the fees for pure Portfolio Selection Services received by Defendants from the Funds. PAC shares office space, resources and advisory personnel with Defendants and provides identical portfolio management services. PAC reports its securities holdings jointly with Defendants on a form prepared and signed by Defendants.

85. PAC managed a stock portfolio for the Pennsylvania Public School Employees’ Retirement System (the “Pennsylvania Retirement System”). The Pennsylvania Retirement System portfolio managed by PAC was comparably sized to the smaller Funds but is dwarfed by the larger Funds. However, the total management fee received by PAC from the Pennsylvania Retirement System is far lower (in percentage and dollar terms) than the fee for pure Portfolio Selection Services received by Defendants from any of the Funds. Further, the Pennsylvania Retirement System fee includes all administrative and distribution expenses (the Pennsylvania Retirement System pays no Promotional Distribution Fees or other 12b-1 Distribution Fees). Finally, in what is clearly the result of an arms’ length bargain, PAC agreed to dramatically better breakpoints than those agreed to with the Funds. The total management fees charged to the Pennsylvania Retirement System in a recent year are compared to the Portfolio Selection Fees charged by Defendants to the Funds in Exhibit 8.

86. PAC also managed a stock portfolio for the State Board of Administration of Florida (the “Florida SBA”). As with the Pennsylvania Retirement System portfolio, the Florida SBA portfolio was significantly smaller than the Funds’ portfolios. Once again, despite the Florida SBA’s significantly smaller size, the management fee (which includes all administrative

and distribution expenses) received by PAC in recent years from the Florida SBA is far lower (in percentage and dollar terms) than the fee for just the pure Portfolio Selection Services received by Defendants from the Funds. Again, the Florida SBA paid no Promotional Distribution Fees or other 12b-1 Distribution Fees. Also, like the agreement with the Pennsylvania Retirement System (in what is again clearly the result of an arms' length bargain), PAC agreed to dramatically better breakpoints than those agreed to with the Funds.

87. Because the fee received from other institutional clients includes all administrative and distribution expenses, the portion of the fee received from other institutional clients for pure Portfolio Selection Services is actually less than the amounts shown in the tables at Exhibit 8, thereby underscoring Defendants' violation of 36(b). By comparison, the total expense burden (i.e., including all administrative and 12b-1 expenses) for the Putnam Voyager Fund's Class A shares in 2007 was \$62.5 million and for the Putnam Fund for Growth and Income A shares in 2006 was over \$107 million.

88. In short, the Portfolio Selection Fees (as a percentage of assets) received by Defendants are at least double, frequently triple, and, at certain breakpoints, quadruple those received from much smaller institutional clients for the very same advisory services. When considered in dollar terms (rather than as a percentage), the Portfolio Selection Fees received by Defendants from the Funds are up to hundreds of times larger than the fees paid by some institutional clients with much smaller portfolios invested in the same securities.

89. There is no legitimate basis for this marked disparity in fees received by Defendants from the Funds when compared to fees received by them or their affiliates from other institutional clients. The Defendants recover additional administrative costs associated with

large numbers of shareholders in mutual funds through separate administrative fees received from the Funds. The Freeman and Brown study explains why the identity of the portfolio owner does not justify higher Portfolio Selection Fees:

The [fund] manager may encounter different levels of fixed and variable research costs depending on the type of the portfolio, . . . the fundamental management process is essentially the same for large and small portfolios, as well as for pension funds and mutual funds. The portfolio owner's identity (pension fund versus mutual fund) should not logically provide a reason for portfolio management costs being higher or lower.

Freeman & Brown Study at 627-28 [Exhibit 5]. The “‘apples-to-apples’ fee comparisons between equity pension managers and equity fund managers can be most difficult and embarrassing for those selling advice to mutual funds.” *Id.* at 671-72 [Exhibit 5].

90. The significant economies of scale created solely by virtue of the Plaintiffs’ and other shareholders’ investment dollars in the Funds have been unlawfully retained by the Defendants, and Promotional Distribution Fees have been received by Defendants despite a lack of benefit to the Funds or their shareholders, in violation of Section 36(b).

(3) Fallout Benefits (Indirect Profits) Attributable to the Funds

91. Defendants also indirectly profit because of “fallout benefits” attributable to the Funds. These profits are above and beyond those received through Portfolio Selection Fees and other fees.

92. Fallout benefits include the attraction of new customers for other funds or products offered by Defendants, cross selling Defendants’ other funds and services to current Fund shareholders, and other benefits associated generally with the development of goodwill and the creation and growth of a client base for Defendants.

93. Another profitable fallout benefit received and retained by Defendants is “soft dollar” payments. Essentially, “soft dollars” are credits from broker-dealers and other securities industry firms in exchange for Defendants’ routing securities transaction orders and other business to the broker-dealers.

94. These soft-dollars can amount to payments surpassing the total Portfolio Selection Fees and 12b-1 Distribution Fees paid to the Defendants. From 2002 to 2006, the Funds paid more than \$113 million for executing trades with soft-dollar brokers. If Defendants had sought and obtained the best execution for these trades without the soft-dollar kickbacks, the Funds and the Plaintiffs could have saved money that was improperly retained by Defendants at the Funds’ expense. Defendants continue to improperly retain the Funds’ money in this manner to the present date. For example, in 2007 Putnam Voyager Fund and Putnam Fund for Growth and Income together paid over \$2.7 million in soft dollar commissions, amounting to approximately 26% of total commissions paid by those funds.

95. The board of trustees for the Funds fails to properly consider fall-out benefits from soft dollars when evaluating the fees paid to the Defendants.

96. According to the SEC, “[s]oft-dollar arrangements create incentives for fund advisers to (i) direct fund brokerage based on the research provided to the adviser rather than the quality of execution provided to the fund, (ii) forego opportunities to recapture brokerage costs for the benefit of the fund, and (iii) cause the fund to overtrade its portfolio to fulfill the adviser’s soft-dollar commitments to brokers.” Memorandum from Paul F. Royce, director of the SEC Division of Investment Management, June 2003.

97. As noted by the SEC, institutional investors other than mutual funds that negotiate at arms' length often negotiate "soft dollar" or commission recapture programs and directly participate in the benefits wrongfully retained by Defendants from the Funds and the Plaintiffs. The Funds and their board of trustees could, but do not, negotiate such arrangements and, instead, Defendants have usurped that opportunity for their exclusive benefit.

98. Defendants and their affiliates also receive other benefits or "kickbacks," either directly or indirectly, such as transfer agency and custodian fees. These fees automatically increase as the assets under management and the number of shareholders in the Funds increase. For fiscal year 2007, transfer and custodian fees alone add up annually to just under 37 basis points (0.37%) for Voyager and 18 basis points (0.18%) for Growth and Income in additional revenue for Defendants and their affiliates, Putnam Fiduciary Trust Company and Putnam Investor Services. These affiliates receive similar fees from the other Funds while comparable fees paid by other institutional investors are either included in the overall management fee negotiated at arms' length or cost far less through Defendants or competitive third party providers. Defendants and their affiliates continue to receive these additional fees at similar (excessive) levels to the present date.

99. These and other fallout benefits are required to be disclosed to the Funds' board of trustees as part of the total mix of information necessary to determine the reasonableness of the Portfolio Selection Fee and the reasons for a 12b-1 Distribution Plan and the related Promotional Distribution Fees. Even without considering the fallout benefits, the Portfolio Selection and Promotional Distribution Fees are excessive in both percentage and dollar terms. After considering the fallout benefits, these fees are obscene and their receipt by Defendants violates § 36(b) of the Investment Company Act of 1940.

(4) The Nature and Quality of the Services Provided to the Funds' Shareholders

100. The nature of the Portfolio Selection Services provided to the Funds is straightforward: Defendants select (buy, sell or hold) and trade, at its discretion, stocks, bonds, and other securities for the Funds. This is precisely the same service provided to Defendants' other institutional clients even though the Funds are charged a dramatically higher Portfolio Selection Fee as a percentage of assets under management and in dollar terms.

101. The quality of the Portfolio Selection Services provided to the Funds by Defendants is also precisely the same (because the services are the same) as the quality of the Portfolio Selection Services provided to the other institutional clients. However, Plaintiffs pay Defendants dramatically higher fees (in percentage and absolute dollar terms) because the Portfolio Selection Fees are not even close to the range of fees produced by the arms' length negotiations with Defendants' other institutional clients (even before considering the enormous additional fallout benefits received by Defendants).

102. Furthermore, the Defendants' services to the Funds are even more overpriced when performance is considered. For example, during the five fiscal years ending July 31, 2007, Class A Share investors paid management, shareholder service, and 12b-1 Distribution fees of nearly \$450 million for the Voyager Fund alone, despite under performing the Russell 1000 Growth Index by more than 55% in that same five-year period. From October 31, 2001 through October 31, 2006, Defendants or their affiliates received more than \$625 million in management, shareholder servicing, and 12b-1 Distribution Fees from the Class A Shares of the Fund for Growth and Income alone, even though these shares significantly underperformed the Standard & Poor's 500 stock index (performance that can be purchased at a significantly lower cost) during that period. Indeed, despite paying Defendants nearly \$67.5 million for management fees

alone for the fiscal year ending October 31, 2006, the Fund for Growth and Income significantly underperformed both the Standard & Poor's 500 stock index and the Lipper Large Cap Value index.

103. Also, between 1993 and 2002, Defendants liquidated, renamed or merged 44 mutual funds, in large part due to poor performance (liquidation or merger allows Defendants to remove a fund's poor track record from their reported performance). The nature and quality of Portfolio Selection Fees provided to the Funds totally fail to justify the cost.

104. The nature of services provided for the Promotional Distribution Fee is also straightforward: Defendants take money from current Fund shareholders in an effort to attract new shareholders to the Funds ostensibly so that all shareholders can enjoy cost savings from economies of scale. The existence of Y Shares tells the story: the use of Promotional Distribution Fees has never achieved the desired (and required) cost savings, should never have been approved or continued by the Funds' board of trustees, and violates Section 36(b) of the ICA.

(5) The Profitability of the Fund to the Adviser-Manager

105. The profitability to Defendants of managing the Funds is a factor that the Court may consider. Intuitively, it is obvious that the fees charged to others in arms' length negotiations is the best indicator of profitability to Defendants; those negotiations must result in profitable relationships or investment managers (such as Defendants) intending to stay in business would be required to charge a higher fee. Therefore, managing the Funds (and receiving much higher Portfolio Selection Fees and Promotional Distribution Fees than from other institutional clients) is highly profitable to Defendants.

106. For example, Defendants received approximately \$41.5 million in management fees from Voyager Fund during its most recent fiscal year. Of that, over \$29.1 million is for pure Portfolio Selection Services. By contrast, in 1990 the total management fee, including all expenses and pure Portfolio Selection Services, amounted to less than \$5 million. The receipt of such a dramatic increase in fees for pure Portfolio Selection Services (in the face of dramatic economies of scale) while Putnam manages comparable (but much smaller) portfolios for a much smaller fee is in breach of Defendants' fiduciary and other duties to the Funds.

107. Defendants received approximately \$67.4 million in management fees from the Fund for Growth and Income during its most recent reported fiscal year (2006). Of that, as much as \$50.8 million is for pure Portfolio Selection Services. In 1991, the total management fee, including all expenses and pure Portfolio Selection Services, amounted to just over \$11 million. The receipt of such a dramatic increase in fees for pure Portfolio Selection Services (in the face of dramatic economies of scale) while Putnam manages comparable (but much smaller) portfolios for a much smaller fee is a breach of Defendants' fiduciary and other duties to the Funds.

108. The total Portfolio Selection Fee received by Defendants from each Fund is shown on the attached Exhibit 4.

109. Furthermore, each dollar of Promotional Distribution Fees received by Defendants directly increases Defendants' profitability in an equal amount. These fees, by definition, are received by Defendants to cover their expenses, not those of the Funds (under the theory that those expenses would ultimately save the Plaintiffs and the Funds money). The amount of these fees has been steadily increasing. For 1991, the Voyager Fund paid less than

\$2 million in 12b-1 Distribution Fees. For the year ending July 31, 2007, that fund paid 12b-1 Distribution Fees of \$24.1 million. Similarly, in 1991, the Fund for Growth and Income paid \$4.5 million in 12b-1 fees. For the fiscal year ending October 31, 2006, that fund paid 12b-1 Distribution Fees of over \$51 million. In the first six months of fiscal year 2007, the Fund for Growth and Income paid approximately \$23.2 million in 12b-1 fees. The amount of Promotional Distribution Fees increased proportionately with total 12b-1 Distribution Fees for these and all of the Funds.

110. As discussed above under “comparative fee structures,” Defendants and their affiliates have in the recent past entered into advisory agreements with other institutional clients where Defendants accept total management fees (including both Portfolio Selection Fees and payment of all administrative, distribution and other costs) that quickly step down to as low as 15 basis points (0.15%) to manage portfolios that are typically much smaller than those of the Funds. Even on the conservative assumption that all of the other institutional clients’ fee was for Portfolio Selection Services, it is still dramatically smaller in percentage terms (and obscenely so in dollar terms) than the same fees received from the comparably sized or significantly larger Funds, and is not within the range established by Defendants with its other customers when negotiating at arms’ length. Therefore, the immense profitability of the Funds’ management for the same services is self-evident.

111. Furthermore, the availability of Y Shares (shares free from all 12b-1 distribution fees) further establishes that the Promotional Distribution Fees received by PRM constitute pure profit to Defendants.

(6) The Independence and Conscientiousness of the Trustees (or Directors)

112. As the GAO Report noted, the “external management” structure of most mutual funds (including the Funds) creates a potential conflict of interest between a fund’s shareholders and its adviser. [Exhibit 7]. The United States Supreme Court has stated that the disinterested director requirement is “the cornerstone of the ICA’s efforts to control” this conflict of interest. *Burks v. Lasker*, 441 U.S. 471 (1979).

113. The disinterested directors (or trustees) are supposed to serve as “watchdogs” for the shareholders of the Funds. As such, the disinterested directors have primary responsibility for, among many other things, negotiating and approving all agreements with Defendants and reviewing the reasonableness of the Portfolio Selection Fees and Promotional Distribution Fees received by Defendants. Accordingly, as noted by the GAO, the directors are expected to review, among other things, the adviser’s costs, whether fees have been reduced when the Funds’ assets have grown, and the fees charged for similar services. See GAO Report at 14 [Exhibit 7]. These responsibilities necessarily require the directors to rely on information provided by Defendants. Defendants, in turn, have a fiduciary duty to provide all information reasonably necessary for the directors to perform their obligations.

114. In considering whether to approve advisory agreements between the Defendants and the Funds, the trustees are required to review and consider specific factors, and to make certain comparisons, to ensure that any agreement is in the best interests of the Fund and its shareholders (rather than just the Defendants). The SEC has recognized that this inquiry includes the following specific factors:

(1) the nature, extent, and quality of the services to be provided by the investment adviser; (2) the investment performance of the fund and the investment adviser; (3) the costs of the services to be provided and profits

to be realized by the investment adviser and its affiliates from the relationship with the fund; (4) the extent to which economies of scale would be realized as the fund grows; and (5) whether fee levels reflect these economies of scale for the benefit of fund investors.

115. In addition, the SEC has recognized that a fund's trustees must compare the fees and services to be provided by the adviser in any proposed contract with a fund with those in other investment advisory contracts, such as contracts between the same (and other) investment advisers with other investment companies (*i.e.*, mutual funds) or other types of clients (*e.g.*, pension funds and other institutional investors). This information has been partially withheld by Defendants from the Funds' board of trustees (and also from the shareholders) and the board has failed to properly consider the information.

116. A majority of the Funds' directors must be "disinterested" as defined in § 10 of the Investment Company Act. The ICA contains a presumption that the disinterested directors are in fact disinterested. However, even in connection with so-called disinterested directors, the lack of conscientiousness in reviewing the fees paid to the Defendants, the lack of adequate information provided by the Defendants to the directors in connection with their approvals of the advisory agreements, and the control of management over the board in reviewing the fees are not presumed. Rather, they are all relevant factors in determining whether the Defendants have breached their fiduciary duties to the Funds and to the Plaintiffs.

117. Despite the structural protections of independent directors envisioned by the Investment Company Act, the Funds' trustees have been subverted by Defendants and no longer serve in their "watchdog" role.

118. The Defendants have failed to satisfy their fiduciary duty under the Investment Company Act to provide the Funds' directors with all information reasonably necessary for them to do their jobs, including determining the fairness of the Portfolio Selection Fee and the Promotional Distribution Fee and that information has not been properly considered by the directors.

119. Jack Bogle, founder of the Vanguard Group, one of the largest mutual fund complexes in the world, commented during an interview on the failure of mutual fund boards of directors to meet their duties under the Act:

Q: We've talked about how the [mutual fund] industry could do a better job. How about the fund directors?

A: Well, fund directors are, or at least to a very major extent, sort of a bad joke. They've watched industry fees go up year after year, they've added 12b-1 fees. I think they've forgotten, maybe they've never been told, that the law, the Investment Company Act, says they're required to put the interest of the fund shareholders ahead of the interest of the fund adviser. It's simply impossible for me to see how they could have ever measured up to that mandate, or are measuring up to it.

Morningstar Interviews...Jack Bogle, Founder of the Vanguard Group, Kathryn

Haines and Russ Kinnel, www.morningstar.net, posted June 5, 1998.

120. Similarly, a United States District Court Judge recently quoted Warren Buffet, the "legendary investor and chairman of the Berkshire Hathaway Group," on the lack of independence and diligence of mutual fund boards of directors:

I think independent directors have been anything but independent. The Investment Company Act, in 1940, made these provisions for independent directors on the theory that they would be the watchdogs for all these people pooling their money. The behavior of independent directors in aggregate since 1940 has been to rubber stamp every deal that's come along from management – whether management was good, bad or indifferent. Not negotiate for fee reductions and so on. A long time ago,

an attorney said that in selecting directors, the management companies were looking for Cocker Spaniels and not Dobermans. I'd say they found a lot of Cocker Spaniels out there.

Strougo v. BEA Assoc., 188 F.Supp.2d 373, 383 (S.D.N.Y. 2002)(citation omitted).

121. The dependence of the Funds' disinterested directors on the Defendants, and the domination and undue influence exerted on the directors by the Defendants, is evidenced by the following facts:

- a. Each of the Funds is governed by a common and interlocking board of directors initially selected (and constantly dominated by) the Defendants.
- b. All 107 different Putnam mutual funds are "overseen" by one common board of 11 directors, 10 of whom are considered "disinterested." Each of these directors are paid well in excess of \$200,000 annually as a retainer and for minimal work. The Defendants have *de facto* control over the nature of director meetings and other aspects of the Funds' corporate governance, thereby depriving the Funds of the independence owed to them by the trustees.
- c. Each of the Funds, and all funds within the Putnam Fund Complex, share common fiduciary advisers (*i.e.*, the Defendants or their affiliates). The Defendants created these relationships and continue to dominate in their execution.
- d. Each of the Funds, and all funds within the Putnam Fund Complex, share a common distributor affiliated with the Defendants (*i.e.*, the Funds' shares are sold by an affiliate of the Defendants).

- e. Trustees in the mutual fund industry almost without exception rely wholly on the fund manager to provide them with what is known in the industry as a “15c Report” (also called a “Lipper Package”). Such 15c Reports generally include information about what other mutual fund investment advisors charge their mutual fund clients but does not include data about Defendants’ or other advisors’ other institutional clients (as that data is withheld by fund managers from the trustees). Fund managers use the data in the 15c Report to ensure that their fees fall within the range of fees charged by their “competitors,” an industry of price gougers, rather than to ensure that the Portfolio Selection Fees received by Defendants are independently fair to the Funds. Here, Defendants have failed to provide correct and complete information to the trustees, and the trustees have failed to consider properly the information provided.
- f. Each of the Funds, and all funds within the Putnam Fund Complex, have access to a common line of credit arranged by the Defendants to assist in managing money flows in the Funds (*e.g.*, to meet shareholder redemptions). The fees pertaining to such credit facility are shared equally by the Funds and all other funds within the Putnam Fund Complex (thereby also again demonstrating benefits from economies of scale).

COUNT I
ICA § 36(b) BREACH OF FIDUCIARY DUTY
(Excessive Fees from Economies of Scale)

- 122. The Plaintiffs repeat and reallege paragraphs 1 through 123, inclusive, of this complaint.

123. Defendants have received, and continue to receive, excessive Portfolio Selection Fees attributable to the extraordinary economies of scale created by the Plaintiffs and the Funds.

124. Defendants have breached, and continue to breach, their ICA § 36(b) fiduciary duty to the Funds by receiving and retaining these excessive fees.

125. Plaintiffs seek, pursuant to § 36(b)(3) of the ICA, the “actual damages resulting from the breach of fiduciary duty” by Defendants, including the “amount of compensation or payments received from” the Funds.

COUNT II
ICA § 36(b) BREACH OF FIDUCIARY DUTY
(Excessive Investment Advisory Fees)

126. Plaintiffs repeat and reallege paragraphs 1 through 123, inclusive, of this complaint.

127. The Portfolio Selection Fees received by PIM are and continue to be disproportionate to the services rendered and not within the range of what would have been negotiated at arms’ length in light of all the surrounding circumstances (or the range of what has been negotiated at arms’ length with the Defendants’ other institutional clients). Instead, they are dramatically higher than those negotiated or that would be negotiated in any arms’ length negotiation.

128. In receiving excessive advisory fees, and failing to put the interests of the Funds, the Plaintiffs, and the Funds’ other shareholders ahead of their own interests, PIM breached its statutory fiduciary duties to the Funds and the Plaintiffs.

129. Defendants have breached, and continue to breach, those statutory ICA § 36(b) fiduciary duties to the Funds by accepting excessive and inappropriate compensation. Plaintiffs and the Funds seek, pursuant to § 36(b)(3) of the ICA, the “actual damages resulting from the breach of fiduciary duty” by Defendants, up to and including, “the amount of compensation or payments received from” the Funds.

COUNT III

ICA § 36(b) BREACH OF FIDUCIARY DUTY (Excessive Rule 12b-1 Promotional Distribution Fees and Extraction of Additional Excessive Compensation)

130. Plaintiffs repeat and reallege paragraphs 1 through 123, inclusive, of this complaint.

131. The Promotional Distribution Fee extracts additional compensation for advisory services in violation of Defendants’ fiduciary duty under § 36(b). Although the assets of the Funds have grown considerably, the resulting economies of scale benefited only Defendants, and not Plaintiffs or the Funds, precisely as feared by the SEC.

132. In failing to pass along economy of scale benefits from the Promotional Distribution Fees, and in continuing to authorize, assess and collect Promotional Distribution Fees pursuant to the Funds’ 12b-1 Distribution Plan, despite the fact that no benefits inured to Plaintiffs or the Funds, Defendants violated their ICA § 36(b) fiduciary duty by receiving excessive and inappropriate compensation. Plaintiffs seek, pursuant to § 36(b) of the ICA, the “actual damages resulting from the breach of fiduciary duty” by Defendants, including all Promotional Distribution Fees and any further “amount of payments received from” the Funds.

WHEREFORE, Plaintiffs and the Funds demand judgment as follows:

- a. Declaring that the Defendants violated and continue to violate § 36(b) of the ICA and that any advisory agreements and Distribution Plans entered into between them and the Funds are void *ab initio*;
- b. Preliminarily and permanently enjoining the Defendants from further violations of the ICA;
- c. Awarding damages against the Defendants in an amount including all Portfolio Selection Fees and Promotional Distribution Fees paid to them by Plaintiffs and the Funds for all periods not precluded by any applicable statutes of limitation and continuing through the trial of this case;
- d. Awarding any further “actual damages resulting from [Defendants’] breach of fiduciary duty,” including any further “amount of payments received from” the Funds;
- e. Awarding interest, costs, disbursements, attorneys’ fees, and such other items as may be allowed to the maximum extent permitted by law;
- f. Awarding prospective relief in the form of reduced Portfolio Selection Fees and Promotional Distribution Fees in the future based not simply upon a percentage of assets formula, but also based upon the reasonableness of those fees in absolute dollar terms when considering the assets under management in the Funds; and
- g. Such other and further relief as may be proper and just.

Dated: December 31, 2007

Respectfully submitted,

JOHN J. VAUGHN
GERALD A. KALBFLEISCH
MICHAEL and MYRTLE HATHAWAY
